Abstract

In system design we frequently have to bootstrap our understanding by making assumptions and estimates. An example of making assumptions and estimates is provided for an apple handler system.

Apple Handler Functional Design

Vision Design

exposure time
1 ms

camera
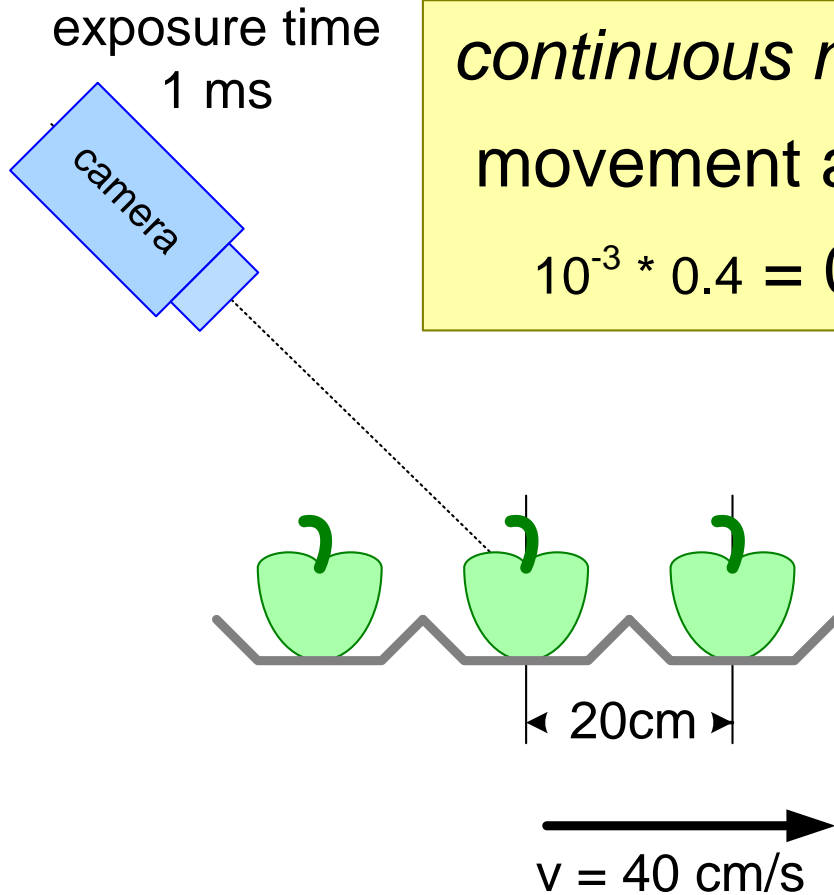

continuous movement

movement artefact =

$10^{-3} * 0.4 = 0.4$ mm

v
$t_{stopped}$ = 50 ms
$t_{acceleration}$ = 50 ms
$t_{continuous}$ = 400 ms

◄ 20cm ►

v = 40 cm/s

start-stop movement

acceleration = 1.6 m/s^2

USN   ESI

Belt Throughput (continuous movement)

camera
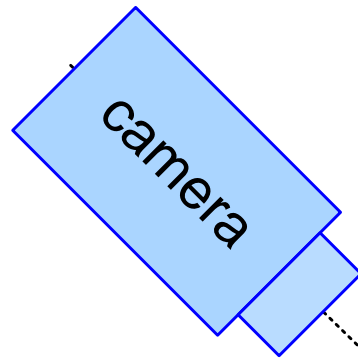

belt throughput =

$5 * 0.4 = 2$ apples/sec

20cm

v = 40 cm/s

USN   ESI

Apples per Yard

1km

1km

apple yard

3m

1m

2m
12 m branches
~7 apples/m
yard size

$10^6\,m^2$
tree density

1 tree / 3 m^2

apples/tree

~84 apples/tree

$$\text{nr apples} = 10^6 * 1/3 * 84 = 28 * 10^6$$

USN   ESI

Operational Hours

| J | F | M | A | M | J | J | A | S | O | N | D |

4 weeks of harvesting

10 hours/day

7 days/week

4 weeks
> ## operational time =
> ## 10 * 7 * 4 = 280 hours

USN   ESI

Throughput

nr apples = $28 * 10^6$

operational time = 280 hours

throughput =

$28 * 10^6 / 280 = 10^5$ apples/hour =

$10^5 / 3600 \sim= 28$ apples/sec

USN   ESI

Assumptions

Every assumption deserves verification

exposure time (1 ms)

acceptable blur due to movement (0.4 mm)

acceleration (1.6 m/s^2)

time needed to stabilize after stopping (50 ms)

required distance between apples (20 cm)

typical area size to be served (1 km^2)

distance between trees in row (1 m)

distance between rows (3 m)

apples per tree (84)

duration of harvesting season (4 weeks)

number of operational hours (10 hours/day, 7 days/week)

*So at least we learned what questions to ask and
we have some expectation to assess the answers we find*

USN   ESI

Other Considerations

What did we ignore?

variation in load, peak load

disturbance of production, e.g. maintenance or break down

What options could we consider?

operate the machine for 24 hours/day, requires more storage

have many parallel belts and cameras

replace camera by alternate solution

target only small apple farms

USN ESI
