## Abstract

The discipline of systems architecting must be developed in the wider context of existing disciplines and related research work. The body of knowledge to be developed consists of a frame of reference, systems architecting methods and case descriptions.

The education of architects must be developed concurrently with the know how. Know how gets value via skilled people.

## Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.
