Abstract

The importance of system architecting for development of products is explained. Current trends show an exponential growth of development teams, product complexity. Team size and product complexity are problematic from cost, time to market and risk point of view. The challenge is to create new products with manageable sized teams. System architecting is one of many measures to cope with this problem.

Architecting is explained in its context and a few main concepts are shown. A curriculum is being developed for (potential) system architects. The next step is to address the managerial context of the system architect. For this purpose a 2 day Management SARCH is developed.

Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.

Course status in Philips

Course	Abbreviation	number of courses upto May 2002	appr. total participants	Lecturers
System Architecture	SARCH	15	230	Gerrit Muller 2002 H2: others
Embedded Systems Architecting; Stakeholders	ESA	5	80	Pierre America Frank Pijpers
System Architecting for Managers	MSARCH	1	12	Gerrit Muller

Goals of 2-day Management SARCH course

managerial awareness of:

- + what is architecting
- + business impact of architecting
- + role and profile of an architect

to

- + enable integral approach
- + stimulate architects to substantially contribute:
 - * at business level
 - * to strategic goals
 - * from technological strength

Program of 2-day Management SARCH

session	subject
day 1 morning	positioning the System Architecture Process Product Creation Process product families, generic developments
day 1 afternoon	role and task of the system architect profile of the system architect documentation, reviewing and other supportive processes
day 2 morning	requirements capturing, roadmapping
day 2 afternoon	HRM aspects; selection, appraisal, career path, etcetera wrap up, expectations, how to continue, evaluation
