

SEESG

Systems Engineering Study Group 2015

The Systems Engineering Study Group meets at Buskerud and Vestfold University College, Kongsberg, Norway. The objective of the meetings is to exchange experience between people who are interested in Systems Engineering or who have the intend to become a Systems Engineer. The SESG discusses one theme per meeting, the subjects are one of many SE aspects. We have two to three meetings per year.

The SESG would like to invite you to the next meeting **14th October** at Buskerud and Vestfold University College, **2pm to 5pm, room 22 (second floor) @ Krona**

Topic: "What happens with requirements management when we start to conceptualize the solutions e.g. through system models? "

Description: Model Based Systems Engineering promises that the traditional document based way of working will be replaced by storing and relating information in the form of models. These models reside in managed repositories, allowing version, configuration and change management. The information in models may range from customer needs and customer context expectations to detailed engineering information. This transition will impact the way we manage requirements. In this meeting we will discuss the impact of model-based working on requirements management.

Agenda and presenters:

14:00-14:10 - Welcome and introduction.

14:10-15:00 - Presenters: Johan Grönvall (KM), Michael Odden (KPS), Svein Egil Moen (KPS) and Bjørn Victor Larsen (KDA).

15:00-15:15 - Break.

15:15-17:00 - Discussions in groups, wrap-up and closing.
