Abstract

Many different titles are used for systems related roles. Examples are systems architect, engineer, designer, tester, or manager. We discuss in this paper these roles and titles. We also explain the context sensitivity of these titles.

Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.
