Abstract

A system architects needs skills to apply different interactions styles, depending on the circumstances. This document discusses the following interaction styles: provocation, facilitation, leading, empathic, interviewing, white board simulation, and judo tactics.

March 27, 2021
status: draft
version: 0.2

provocation	when in an impasse: provoke effective when used sparsely
facilitation	especially recommended when new in a field: contribute to the team, while absorbing new knowledge
leading	provide vision and direction, make choices risk: followers stop to give the needed feedback
empathic	take the viewpoint of the stakeholder acknowledge the stakeholder's feelings, needs, concerns
interviewing	investigate by asking questions
whiteboard simulation	invite a few engineers and walk through the system operation step by step
judo tactics	first listen to the stakeholder and then explain cost and alternative opportunities

Architecting Styles

provocation — when in an impasse: provoke
effective when used sparsely

facilitation — especially recommended when new in a field:
contribute to the team, while absorbing new knowledge

leading — provide vision and direction, make choices
risk: followers stop to give the needed feedback

empathic — take the viewpoint of the stakeholder
acknowledge the stakeholder's feelings, needs, concerns

interviewing — investigate by asking questions

whiteboard simulation — invite a few engineers and walk through
the system operation step by step

judo tactics — first listen to the stakeholder and then
explain cost and alternative opportunities
