Abstract

The business strategy is input to many activities of architects. Lack of clear strategy complicates the work of architects. At the other hand architects need to contribute to the creation and evolution of the business strategy. We discuss several common methods and models to work on strategy, such as Strength, Weakness, Opportunity, and Threat Analysis, road mapping, and technology classification.

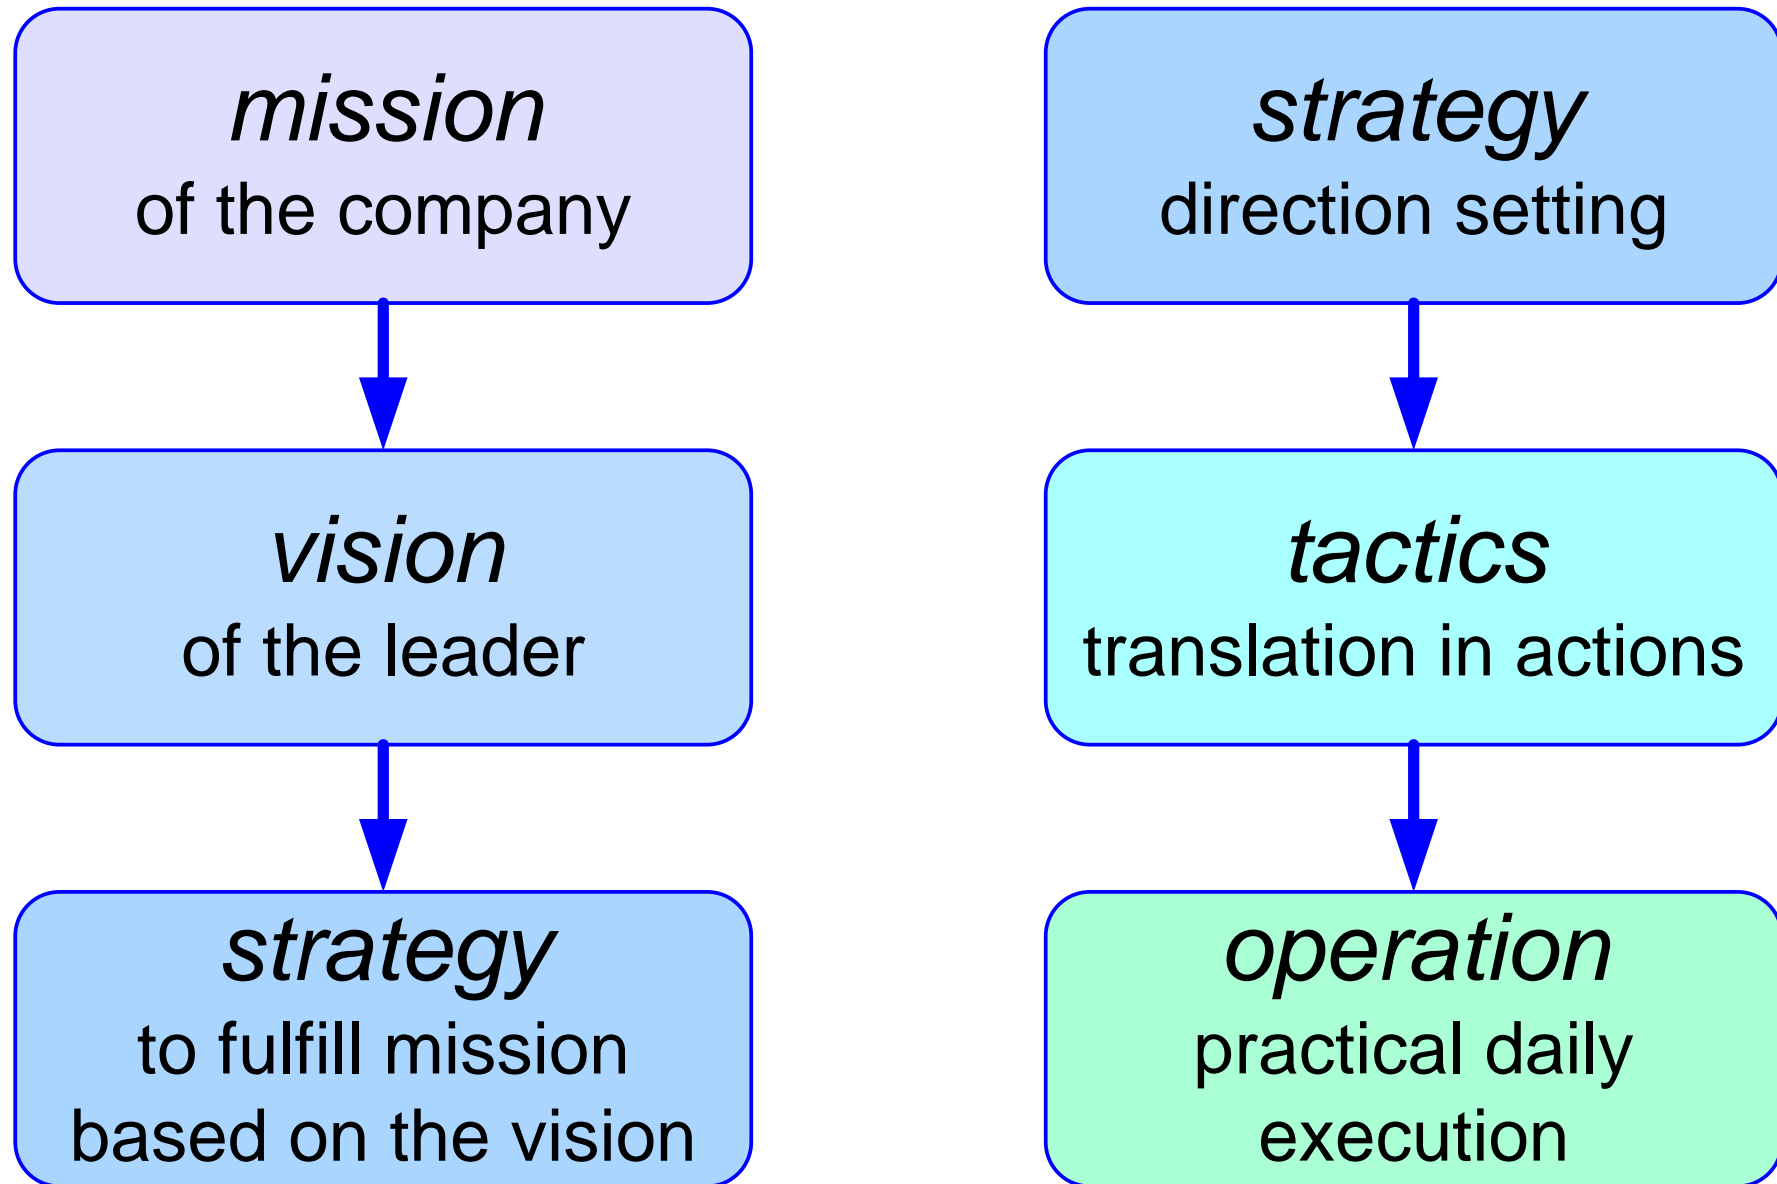

Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.
