Abstract

Readiness level models offer a yardstick to assess the status of specific project aspects. Examples are technology readiness and integration readiness.

Technology Readiness Levels

TRL 9	actual system proven in operational environment
TRL 8	system complete and qualified
TRL 7	system prototype demonstration in operational environment
TRL 6	technology demonstrated in relevant environment
TRL 5	technology validated in relevant environment
TRL 4	technology validated in lab
TRL 3	experimental proof of concept
TRL 2	technology concept formulated
TRL 1	basic principles observed

Integration Readiness Levels

TRL 7	The integration of technologies has been *verified and validated* with sufficient detail to be actionable.
TRL 6	The integrating technologies can *accept, translate, and structure information* for its intended application.
TRL 5	There is sufficient *control* between technologies necessary to establish, manage, and terminate the integration.
TRL 4	There is sufficient detail in the *quality and assurance* of the integration between technologies.
TRL 3	There is *compatibility* (i.e. common language) between technologies to orderly and efficiently integrate and interact.
TRL 2	There is some level of specificity to characterize the *interaction* (i.e. ability to influence) between technologies through their interface.
TRL 1	An *interface* (i.e. physical connection) between technologies has been identified with sufficient detail to allow characterization of the relationship.
