Abstract

This article positions the system architecture process in an acquisition organization. This positioning is intended to help understanding the processes in which the system architect (or team of system architects) is involved. It focuses on an organization that acquires systems that help to realize capabilities.

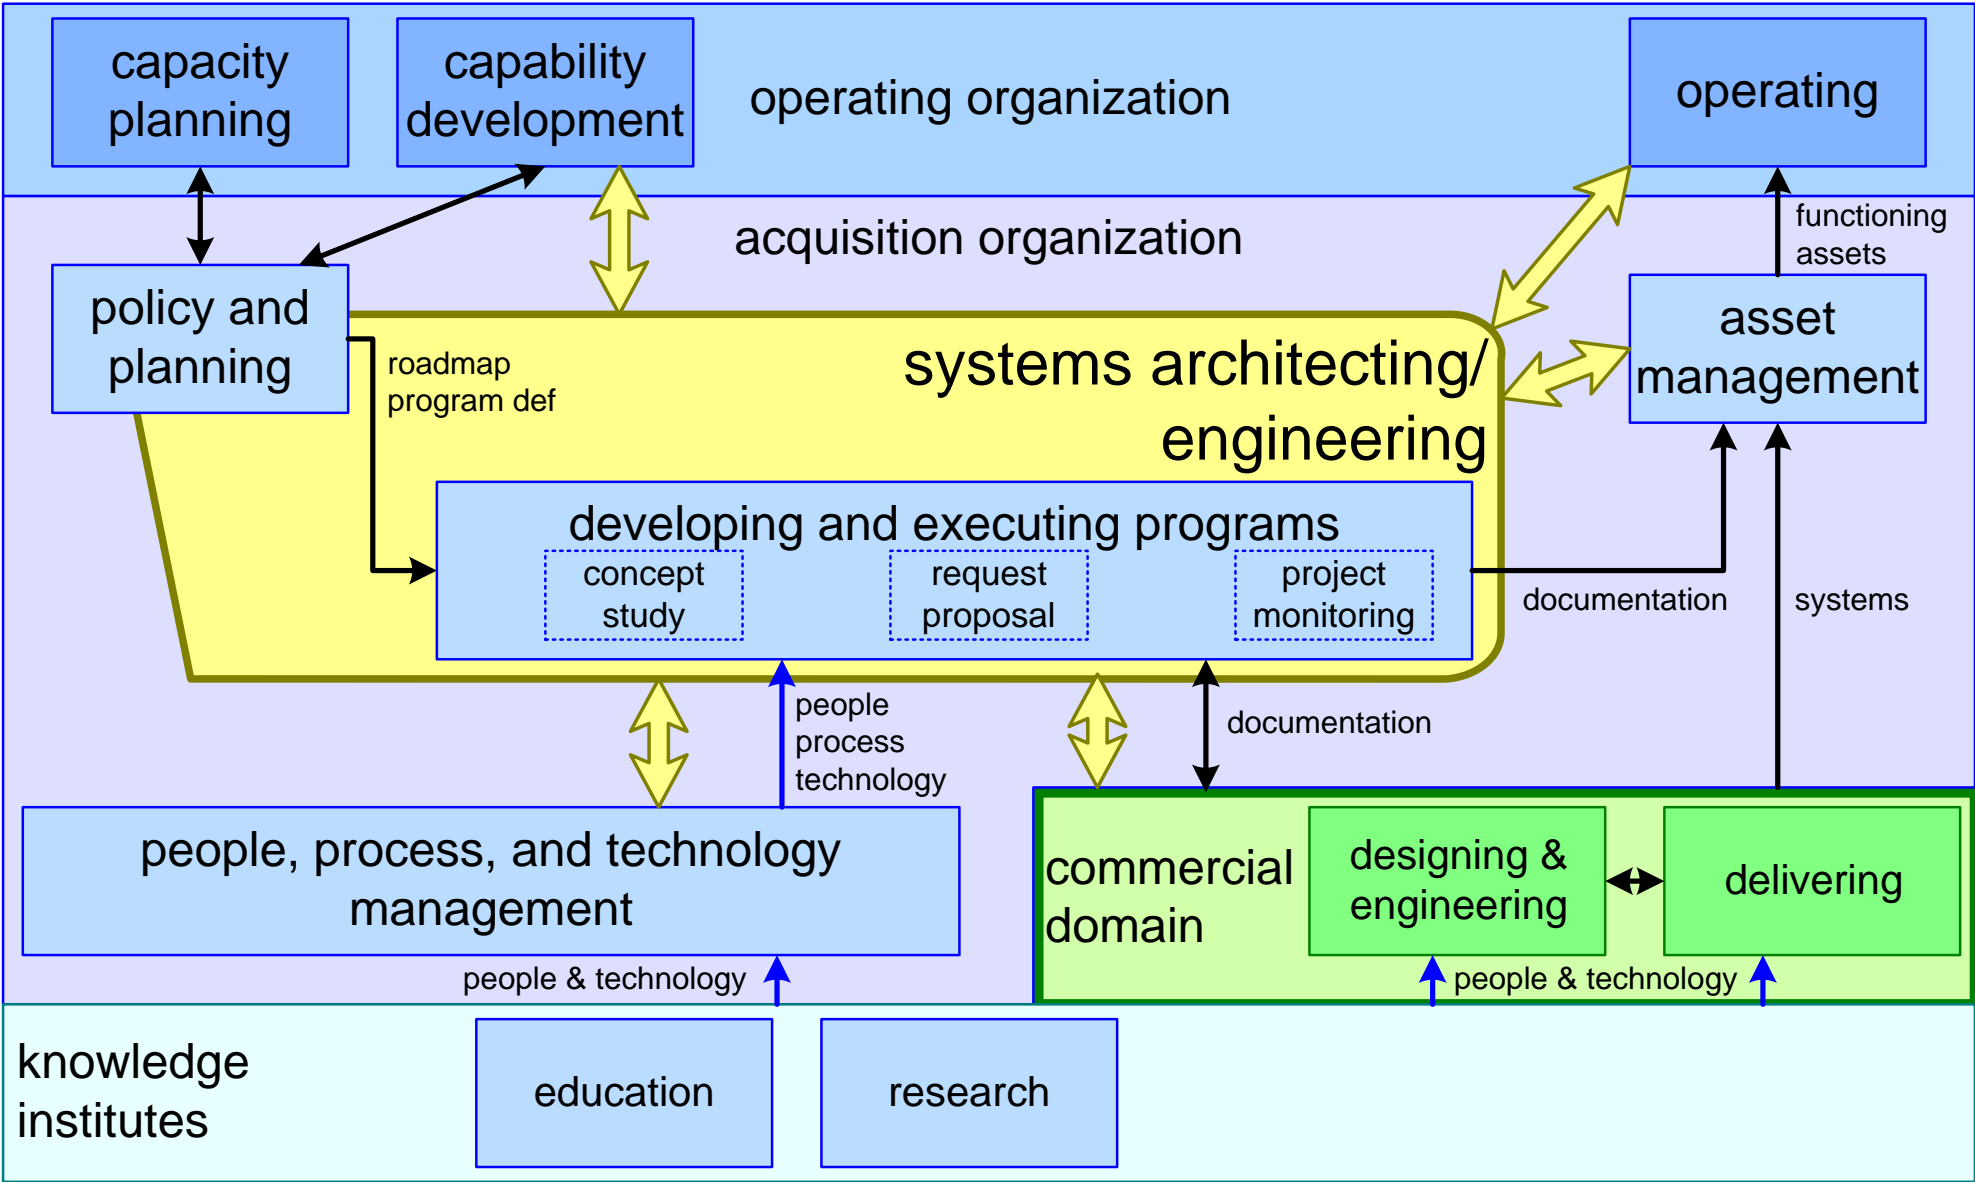

Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.
