## Abstract

The master study Systems Engineering is completed by performing a master project. This document describes objectives for this so-called thesis project.

### Distribution

This article or presentation is written as part of the Gaudí project. The Gaudí project philosophy is to improve by obtaining frequent feedback. Frequent feedback is pursued by an open creation process. This document is published as intermediate or nearly mature version to get feedback. Further distribution is allowed as long as the document remains complete and unchanged.

Apply SE methods, techniques, and concepts in practice and evaluate and reflect on its application, while providing value to the industrial sponsor

# Objectives of Master Project

Apply SE methods, techniques, and concepts in practice and evaluate and reflect on its application, while providing value to the industrial sponsor

# Formalized Goal Statement

---

The goals of the Final Project are:

- the students have to show their **professional competence** and the acquired command of the systems engineering discipline by applying it to a selected problem.
- the selected problem has to be **relevant** in the context of the **company** in which the student works
- **competence** is truly put into **practice**.
- to facilitate the students to make the step from “just applying” to “**critical evaluation** and **reflection**”.
- to verify that students are capable to operate at **academic level**.

# Stakeholders of the Master Project
